1 Introduction

This document explains about the procedure of installing “IM-Workflow English Contents”.

1.1 Glossary

intra-mart WebPlatform/AppFramework	Abbreviated in this document to IWP/AFW .
intra-mart WebPlatform/AppFramework English Contents	Abbreviated in this document to IWP/AFW English Contents.
intra-mart Server Manager	It is a server which manages the whole system. Abbreviated in this document to imSM .
intra-mart Service Platform	It is a main body of server for starting up services. Abbreviated in this document to imSP .
Storage Service	It is a service which manages files. Abbreviated in this document to StorageSrv .

1.2 Prerequisites

Before Installing “IM-Workflow English Contents” on your system, please confirm the following prerequisites:

- “IWP/AFW (including IM-Common Master) has already been installed.
- “IWP/AFW Patch 2” or the newer has been applied.
- “IM-Workflow” has already been installed.
- “IM-Workflow Patch 2” has been applied.
- The character encoding of the server module of IWP/AFW and IM-Workflow has been installed with “UTF-8”.
- The character which transmits to the web browser of the IWP/AFW IM-Workflow has been installed with “UTF-8”.
- “IWP/AFW English Contents (including IM-Common Master) has already been installed.

IWP/AFW needs “Advanced” or “Enterprise for BPM” versions.

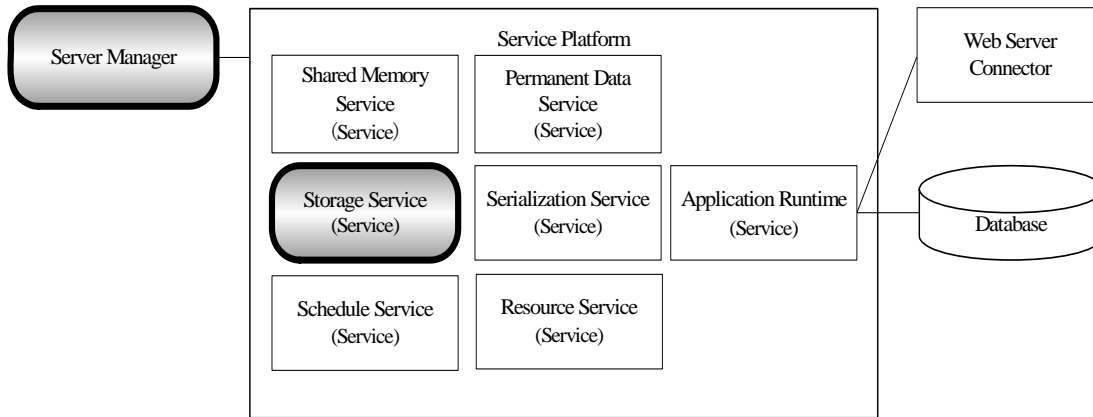

It cannot be run on “Standard” version.

In addition, please have the background knowledge about the environment of the usage of this product before installing. It is recommended to check the followings before installing:

- Composition of the intra-mart server
- The directory in which IWP/AFW has been installed
- The contents directory of the Storage Service (storage by default)
- Free space of the disc

1.3 Modules to be installed

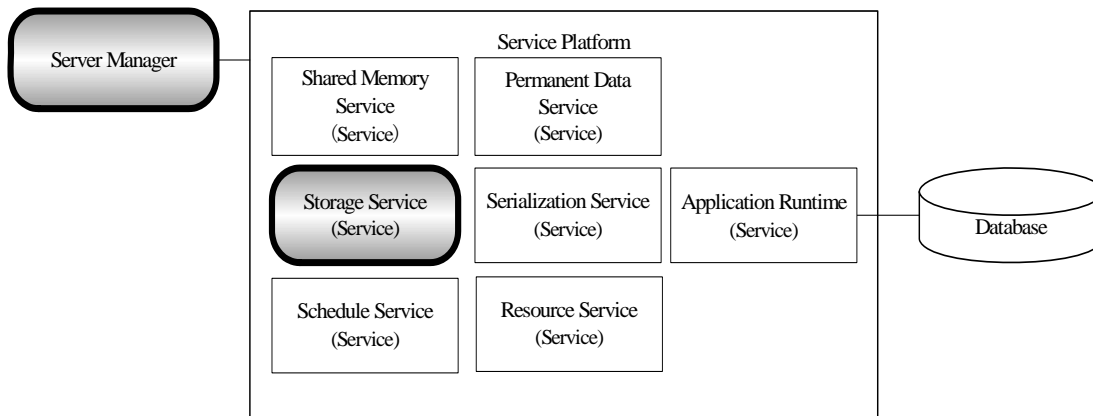

1.3.1 intra-mart WebPlatform

IM-Workflow English Contents will be installed for the following modules.

- Server Manager
- Storage Service

1.3.2 intra-mart AppFramework

IM-Workflow English Contents will be installed for the following modules.

- Server Manager
- Storage Service

2 Installation flow

Please install this product according to the following procedure.

2.1 Installing IWP/AFW (including IM-Common Master)

	Reference	Page
3.1	Installing IWP/AFW (including IM-Common Master)	4

2.2 Installing IM-Workflow

	Reference	Page
3.2	Installing IM-Workflow	4

2.3 Installing IWP/AFW English Contents (including IM-Common Master)

	Reference	Page
3.3	Installing IWP/AFW English Contents (including IM-Common Master)	4

2.4 Installing IM-Workflow English Contents

3.4	Installing IM-Workflow English Contents	5

3 Installation

3.1 Installing IWP/AFW (including IM-Common Master)

For installation of “**IWP/AFW**”, refer to “intra-mart WebPlatform Setup Guide” or “intra-mart AppFramework Setup Guide” attached to **IWP/AFW**.

For installation of “**IM-Common Master**”, refer to “**IM-Common Master Setup Guide**” attached to **IWP/AFW**.

For installation of “**IWP/AFW Patch (including IM-Common Master)**”, refer to “readme.txt” and “history.txt” attached to the patch.

“**IWP/AFW Patch 2**” or the newer need to be applied. Applying the latest patch is recommended.

3.2 Installing IM-Workflow

For installation of “**IM-Workflow**”, refer to “IM-Workflow Setup Guide” attached to IM-Workflow.

For installation of “**IM-Workflow Patch**”, refer to “readme.txt” and “history.txt” attached to the patch.

“**IM-Workflow Patch 2**” or the newer need to be applied. Applying the latest patch is recommended.

3.3 Installing IWP/AFW English Contents (including IM-Common Master)

For installation of “**IWP/AFW English Contents**”, refer to “intra-mart WebPlatform/AppFramework English Contents Setup Guide” attached to **IWP/AFW English Contents**.

If any “**IWP/AFW English Contents Patch**” has been released, it is recommended that the latest patch is applied.

For installation of “**IWP/AFW English Contents Patch**”, refer to “readme.txt” and “history.txt” attached to the patch.

3.4 Installing IM-Workflow English Contents

If any patch for **IM-Workflow and IM-Workflow English Contents** have been released, it is recommended that the latest patch is applied.

For installation of a patch, refer to “readme.txt” and “history.txt” attached.

3.4.1 Starting up and operating the installer

Procedures to start-up and operate the installer are as follows.

- Windows Environment
 1. Check if there is a path to java.exe command.
 2. Use Explorer and move to a directory in which CD-ROM of this product is located.
 3. Move to im_workflow/install directory.
 4. Double click **setup.jar** to start.
 5. Installer screen will be displayed.
 6. Configure the settings items on the Installer screen, and click the [Next] button. Repeat this process until step (7).
 7. Lastly, a list of settings items will be displayed. If everything is OK, click the [OK] button. (if not, press [Prev] button to re-configure)
 8. Installation will start.

- Solaris or Linux Environment
 1. Check if there is a path to java command.
 2. Move to a directory in which CD-ROM of this product is located on the console.
 3. Move to im_workflow/install directory.
 4. Key in **java -jar ./setup.jar** on the console.
 5. Installer screen will be displayed.
 6. Configure the settings items on the Installer screen, and click the [Next] button. Repeat this process until step (7).
 7. Lastly, a list of settings items will be displayed. If everything is OK, click the [OK] button. (if not, press [Prev] button to re-configure)
 8. Installation will start.

3.4.2 Notes on installation

The followings are the notes on input items needed for installation.

- “Directory to save Storage Service contents”

This means root directory of Storage Service contents.

By default, this is “storage”, a directory in which **IWP/AFW** is installed.

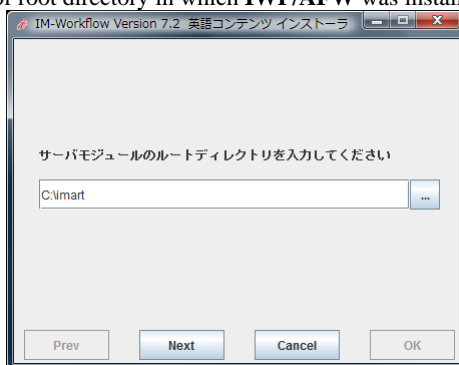

3.4.3 How to Install

3.4.3.1 In case of having IWP/AFW installed with stand-alone type

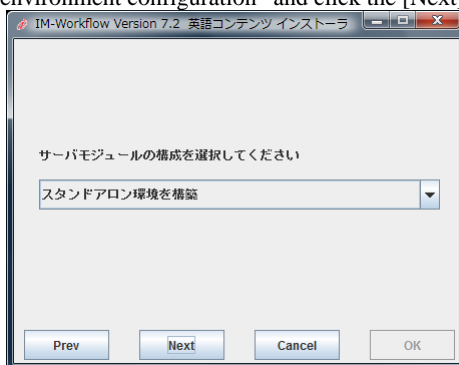

Installation procedure is as follows.

No.	Procedures	Inputs
1	Enter root directory of Server Module.	Enter the full path of the directory in which IWP/AFW was installed.
2	Select the server module configuration. (1: Standalone environment configuration, 2: Distributed environment configuration)?	1
3	Directory to save Storage Service contents	Enter the full path.
4	Install samples? (y/n)	n
5	Is this configuration OK? (y/n)	y

- (1) Enter the full path of root directory in which **IWP/AFW** was installed, and click the [Next] button.

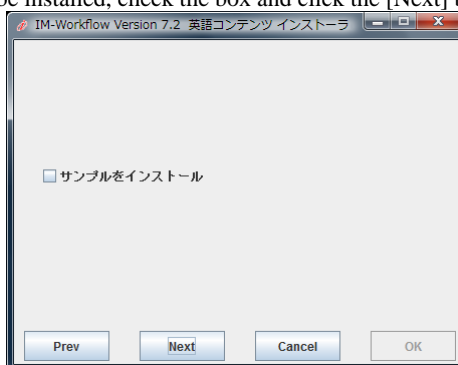

- (2) Select “Standalone environment configuration” and click the [Next] button.

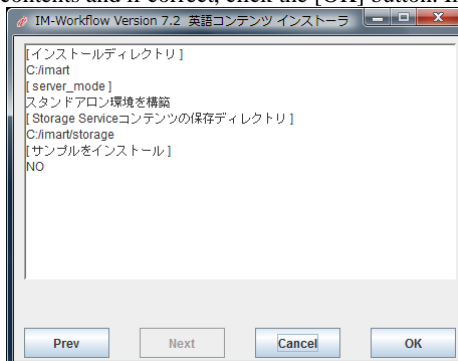

- (3) Enter the full path of “Directory to save Storage Service contents” and click the [Next] button.

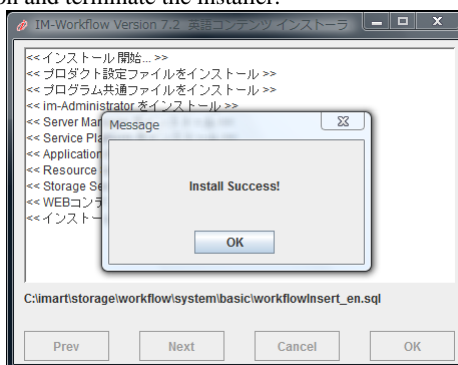

- (4) If any sample is to be installed, check the box and click the [Next] button.

- (5) Confirm the set-up contents and if correct, click the [OK] button. Installation will start.

- (6) When the installation is completed, the dialog will be displayed.
Click the [OK] button and terminate the installer.

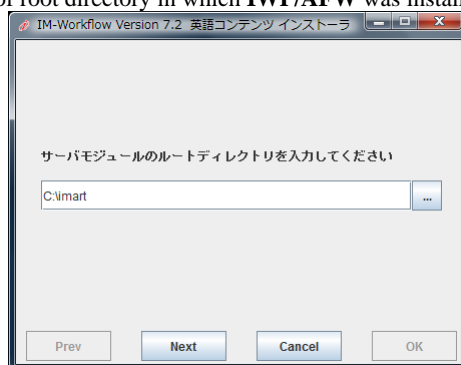

3.4.3.2 In case of having IWP/AFW installed with distributed network type

Repeat the procedure as explained below for the following modules to be installed.

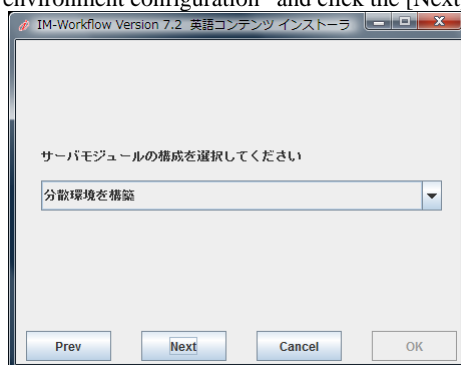

- intra-mart Server Manager
- Storage Service

No.	Procedures	Inputs
1	Enter root directory of Server Module.	Enter the full path of the directory in which IWP/AFW was installed.
2	Select the server module configuration. (1: Standalone environment configuration, 2: Distributed environment configuration)?	2
3	Install Server Manager contents? (y/n)	y
4	Install Storage Service contents? (y/n)	y
5	Directory to save Storage Service contents	Enter the full path.
6	Install samples? (y/n)	n
7	Is this configuration OK? (y/n)	y

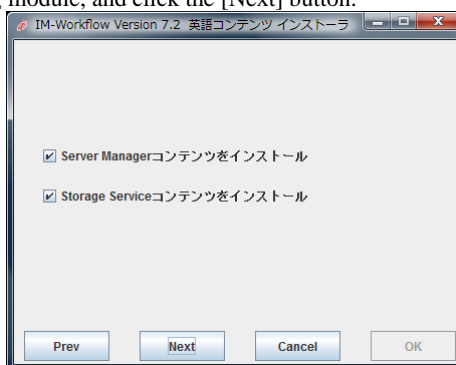

(1) Enter the full path of root directory in which **IWP/AFW** was installed, and click the [Next] button.

(2) Select “Distributed environment configuration” and click the [Next] button.

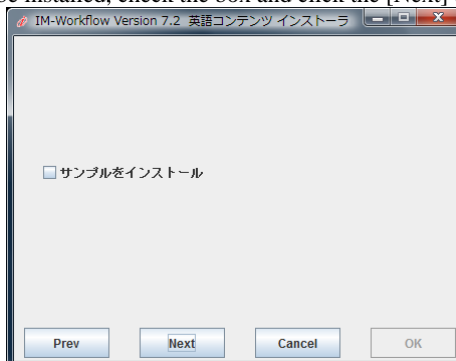

- (3) Select the installing module, and click the [Next] button.

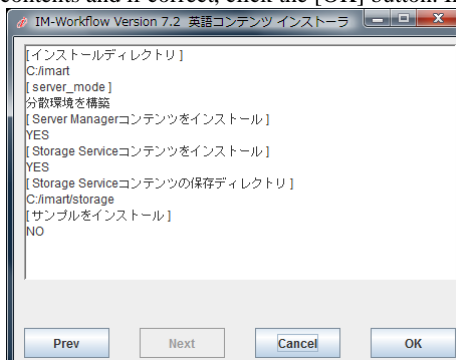

- (4) Enter the full path of “Directory to save Storage Service contents” and click the [Next] button.

- (5) If any sample is to be installed, check the box and click the [Next] button.

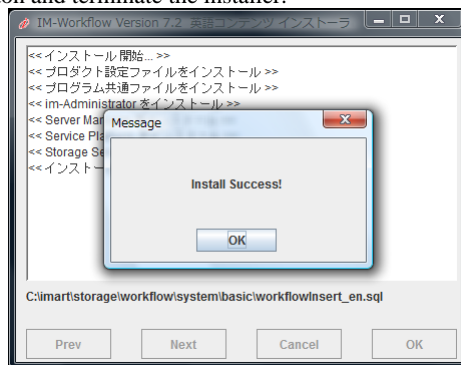

- (6) Confirm the set-up contents and if correct, click the [OK] button. Installation will start.

- (7) When the installation is completed, the dialog will be displayed.

Click the [OK] button and terminate the installer.

3.4.4 Registration on Web Application Server

When using intra-mart AppFramework, registration (deployment) on Web Application Server is required.

With respect to the procedure for registration (deployment) on Web Application Server, refer to “intra-mart AppFramework Setup Guide”.

4 Initial data import

4.1 If “IM-Workflow” and “IM-Workflow English Contents” have been installed concurrently

Log-in as the System Administrator, and from the [License] screen perform “Initial data import” of “**IM-Workflow Set Up Module**”.

IM-Workflow Set Up Module	
プロダクトタイプID	IW
バージョン	7.2.2
インストール日時	10/29,2010 00:00
初期データインポート	default ▼ <input type="button" value="インポート"/>
サンプルデータインポート	default ▼ <input type="button" value="インポート"/>

4.2 If “IM-Workflow English Contents” has been installed after performing initial data import of “IM-Workflow”

* If “IM-Workflow English Contents” is to be additionally installed after starting operation with “IM-Workflow”.

Log-in as the System Administrator, and perform “Initial data import” of “**IM-Workflow English Contents**” from the [License] screen.
